SUMMARY

Software Engineer with strong experience in Java, Spring Boot, and scalable system design. Passionate about building reliable systems, resolving technical issues, and collaborating with teams to deliver efficient solutions. Eager to contribute, learn, and grow in a dynamic engineering environment

TECHNICAL SKILLS

- **Languages:** Java, SQL, JavaScript, HTML5, CSS3
- **Frameworks:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, React.js, Tailwind CSS
- **Tools:** Git, GitHub, Docker, AWS (EC2, RDS), AWS RDS, Vercel, Maven, Postman, Kafka
- **Databases:** MySQL, Redis
- **Soft Skills:** Problem-Solving Skills, Team Player, Project Management, Adaptability, Communication Skills

PROJECTS

Hungry Hub

- Architected a full-stack mess management platform connected via REST APIs, replacing manual complaint logging for 100+ students with real-time meal-plan and expense tracking.
- Built 25+ RESTful APIs following strict Controller–Service–Repository layered architecture for modularity and testability.
- Implemented authentication and authorization using Spring Security with role-based access for students and administrators
- Collaborated with team members during development, testing, and deployment to deliver project milestones on time.
- Link - https://github.com/manishkumar0002/Hungry_Hub

Tech: Java, Spring Boot, MySQL (AWS RDS), Redis, JWT, React.js

IRCTC Railway Reservation System (Academic Project)

- Architected a scalable railway reservation platform with secure authentication, role-based access control (RBAC), and RESTful APIs, supporting passenger and admin workflows while simulating 500+ concurrent booking requests.
- Improved application performance by **35%** through intelligent caching of frequently accessed train and seat availability data, while delivering a responsive booking experience with seamless frontend–backend integration.
- Followed software engineering best practices, SDLC, and Git-based version control throughout development.
- Optimized application performance by integrating Redis caching, reducing API response time by 35%.

Tech: Java, Spring Boot, MySQL (AWS RDS), Redis, JWT, React.js, Vercel

Demo : <https://rail-irctc-frontend.vercel.app/home>

Evaluate AI

- Built and maintained RESTful APIs using Spring Boot for test management and performance tracking.
- Deployed and managed application on AWS EC2 using Docker, handling configuration and environment setup.
- Ensured smooth integration between frontend and backend for real-time data updates and consistent user experience.
- Debugged API and data flow issues using Postman and logs, improving application performance and reducing failure scenarios.

Tech: Java, Spring Boot, MySQL (AWS RDS), Redis, JWT, React.js, Vercel

CERTIFICATIONS

- **Microsoft Certified: Azure Fundamentals (AZ-900)**- [View Credential](#)
- **Java Programming** -. [View Credential](#)
- **Postman API Fundamentals** - Student Expert. [View Credential](#)

ACHIEVEMENTS

- **GeeksforGeeks (GFG) Campus Body** Led the planning and execution of 4+ technical workshops, coding contests, and mock interview drives, benefiting 300+ students in placement preparation.
- **Tata Elxsi TELIPORT Seasons 3** Certificate of Participation [View Credential](#)
- Solved 100+ DSA problems on [LeetCode](#)

EDUCATION

Technocrats Institute of Technology

Bachelor of Technology - Information Technology

CGPA: 8.10

Bhopal, Madhya Pradesh

June 2022 – July 2026

Ramdhari Singh Dinkar High School

Intermediate **Percentage** 67%

P.C. High School

Bihar

April 2020 - March 2022

Bihar
